Field summary for MetaEthics

With which of these meta-ethical views do you MOST identify? (Bonus Question)

Answer	Count	Percentage
Non-cognitivism: Moral statements don't express propositions and can neither be true nor false. "Murder is wrong" means something like "Boo murder!". (1)	186	6.08%
Error theory: Moral statements have a truth-value, but attempt to describe features of the world that don't exist. "Murder is wrong" and "Murder is right" are both false statements because moral rightness and wrongness aren't features that exist. (2)	99	3.24%
Subjectivism: Some moral statements are true, but not universally, and the truth of a moral statement is determined by non-universal opinions or prescriptions, and there is no non-attitudinal determinant of rightness and wrongness. "Murder is wrong" means something like "My culture has judged murder to be wrong" or "I've judged murder to be wrong". (3)	550	17.97%
Substantive realism: Some moral statements are true, and the truth of a moral statement is determined by mind-independent moral properties. "Murder is wrong" means that murder has an objective mind-independent property of wrongness that we discover by empirical investigation, intuition, or some other method. (4)	346	11.31%
Constructivism: Some moral statements are true, and the truth of a moral statement is determined by whether an agent would accept it if they were undergoing a process of rational deliberation. "Murder is wrong" can mean something like "Societal agreement to the rule 'do not murder' is instrumentally rational". (5)	772	25.23%
No answer	279	9.12%

(Optional) Can you think of any changes that you've made in the past month to your daily routines or habits in order to make things go better? These can be tiny changes (e.g., adjusted the curtains on my bedroom window so that less light comes in while I'm sleeping) or large ones. Spend about 60 seconds recalling as many examples of these kinds of changes as you can and listing them here. (If you want to skip this question, leave it blank. If you spend the 60 seconds and no specific examples come to mind, write "none.")
